

THE EASTERN SPECIALTY COMPANY

# HORN BYPASS JUMPERS

CAT. 205

## FUNCTIONALITY

**TESCO Horn Bypass Jumpers** are used on self-contained meter services, to temporarily supply a customer's power while the meter is removed from service. The Jumpers have a high-tension design, which firmly grip the horn bypass on a meter socket. **TESCO Horn Bypass Jumpers** are constructed of 4-AWG heavy-duty copper wire, and rated at 600V/100A. The two copper connectors at each end of the wire are fully insulated for added safety.

All TESCO jumpers are built with the tradition of reliability and ruggedness.

## SPECIFICATIONS

- **Jumper Wire/Rating:** 4 Gauge, Rated at 600 Volts / 100 Amps (continuous); 150 Amps (30 minutes max)
- **Cable Length:** 26" standard (custom lengths available)
