

THE EASTERN SPECIALTY COMPANY

MTB CALIBRATION ADAPTER

CAT. 2450-CAL-30

USE

The MTB Calibration Adapter is a socket adapter that's designed to bring phase A, B, and C current and potentials of a TESCO Multi-Position Test Board to an external RD-30 reference standard for calibration of the Test Board.

If you don't have an RD-30, you can use the TESCO Pulse Blender (Catalog No. 2450-CAL-21) to combine three RD-2X reference standards into one output pulse.

FEATURES

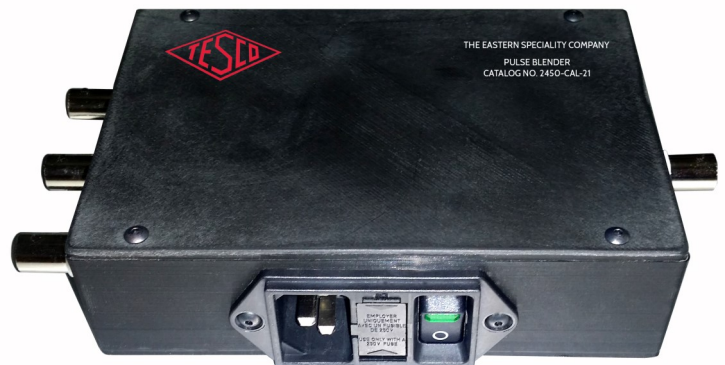

- Safety terminals on cover to protect current and potential wires
- Sturdy handle for easy insertion and removal

SPECIFICATIONS

- **Meter Forms:** 9S
- **Enclosure:** UV stabilized plastic
- **Voltage:** 600V
- **Current Range:** 0-66.7A
- **Rating:** 600V, 66.7A
