## Asset Tracking
full life-cycle management

Existing asset tracking interfaces that are compatible with SAP® software are guaranteed to integrate with **Meter Manager.** We have implemented hundreds of interfaces for use with SAP® software, with more than half repurposing existing interfaces with no changes.

TESCO Meter Manager efficiently and effectively handles complete lifecycle management for all devices:

- Electric, gas and water meters
- AMI communication devices
- CTs and VTs (PTs)
- Transformers

On-premise or cloud implementation. Use our platform or your Azure/ Amazon cloud.

Turn-key managed services available, including end-user support.

Who We Are

With more than 100 years of industry knowledge and experience, **TESCO Meter Manager** seamlessly supports IOUs, Municipalities and Cooperatives of all sizes. We have vast experience with AMI deployments as well as integrating with SAP® software, Oracle® and other utility industry leaders.

- 30 million assets under management including some of America's largest utilities

- Connects to any manufacturer's test and field equipment

- Purchase and lease options

TESCO Meter Manager for use with SAP® Software

Better Together.

- Seamless integration
- Additional functionality
- Increased efficiency

Choose Both

SAP® software has an exceptionally wide suite of solutions for utilities. It does a lot of things really well. However, for some functions, **TESCO Meter Manager** offers more. Together, you can do more!

VERSATILE AND TRUSTED PARTNER

✓ Designed by utility meter shop

✓ Integrates with major meter manufacturers to process notice of shipments, electronically request Return Merchandise Authorization (RMA), and import repair information

✓ Directs meter shop AQL acceptance testing protocols, holding meter shipments in quarantine until testing is complete

✓ Integrates directly with all electric meter, instrument transformer, and gas meter test equipment including **TESCO**, Knopp, RFL, Probewell, Powermetrix, PMT, WECO, Gas Measurement, American, and Dresser

---

DRIVING BUSINESS PROCESS OPTIMIZATION

✓ Tracks functional tests as well as accuracy tests, integrating with the manufacturer's meter software

✓ Track Firmware version

◊ Validate the version received is the version ordered

◊ Reject shipments with wrong version

◊ Flag meters with an old firmware version in the meter shop

◊ Manage over-the-air firmware updates

✓ Integrates with leading Meter Data Management Systems and Head End Systems, validating the Billing K

✓ Provides self-service kiosks and phone apps for checking out devices to individual trucks or technicians

✓ In-Service/Random Sample meter test programs supporting the regulatory (PUC/PSC) sampling and reporting requirements state by state. Customers who have switched to maintaining their in-service test programs in Meter Manager report an 80% reduction in the work required to set up and report on their programs.

Better Together.

For more than a decade, **TESCO Meter Manager** has been the leading off-the-shelf software for managing metering devices. Combined with the reliability and value of packaged software with unparalleled integration capabilities, **Meter Manager** is unsurpassed in the utility industry.

TESCO Meter Manager integrates seamlessly with SAP® software, and you gain additional functionality and efficiency.

✓ Performs Good Receipt (101) transactions after shipment acceptance, while handling rejected shipments internally

✓ Let your staff self checkout devices using either a kiosk or their phone and **Meter Manager** will perform the goods movement (309) transactions

✓ Use **Meter Manager's** direct integration with Itron®, Aclara®, and Landis+Gyr® for RMA handling, while updating SAP® software with the RMA (344) and restock (343) transactions

✓ Do physical inventory reconciliation with **Meter Manager** using handheld scanners and update SAP® software with the correct inventory

THE MAJORITY OF OUR CUSTOMERS INTEGRATE METER MANAGER WITH EITHER SAP® SOFTWARE OR ORACLE®.
