

THE EASTERN SPECIALTY COMPANY

SMARTPOLE METER BOXES

CAT. 701 and 702

ISSUE SOLVED

*How do you install an ANSI C136.41 socket based meter to your streetlight pole? TESCO's Universal **SmartPole Meter Boxes** are the approved method to install an ANSI C136.41 socket based meter to your streetlight pole. These SmartPole Meter Boxes can mount streetlight meters, meter telecommunication devices, or meters for any other pole-mounted services using this form factor.*

FUNCTIONALITY

TESCO's new **SmartPole Meter Boxes** use a 3-pin adapter and are approved for use with overhead services connected to powered pole attachments whether they be internally or externally mounted.

TESCO's **SmartPole Meter Box**, Cat. 701, is designed for smart meters and can be strapped to either a wood or metal pole with the included pole strap kit. The smart meter (not included) is secured to the box with a meter seal lockable strap and is rated for up to 5A self-contained operation.

TESCO's new **SmartPole Meter Disconnect Box**, Cat. 702, combines the required fused disconnect switch along with the same socket and lockable security strap as the Cat. 701.

Cat. 701 SmartPole Meter Box
