

TESCO METERING

TESCO: YOUR ONE-STOP MANUFACTURING PARTNER

BRING MANUFACTURING BACK HOME

TESCO'S VERTICAL INTEGRATION ADVANTAGE

IN-HOUSE CAPABILITIES TO BRING YOUR PRODUCTS TO LIFE

Founded in 1904, TESCO has been the industry leader in meter test equipment for the electric utility industry.

Thanks to our vertical manufacturing capabilities, we remained resilient during the pandemic, continuing production & moving forward while others faced disruptions.

With supply chain challenges & pending tariffs on the horizon, our ability to manufacture in-house ensures stability, reliability, & cost-effective solutions for our customers.

**Looking for a trusted
U.S. manufacturing partner?
Let's make it happen.**

WHY CHOOSE TESCO?

Complete Component & Assembly

→ Reliable, high-quality manufacturing with shorter lead times, and greater consistency.

Precision & Quality Control

→ All processes are done in-house for superior results.

No Large Machinery Investment Required

→ We offer small-batch production for custom needs.

U.S. Based Manufacturing

→ Avoid overseas tariffs and potential supply chain disruptions.

Built on Long-Term Partnerships

→ We don't just build products—we build relationships. Customers have relied on our in-house manufacturing for over 60 years, a testament to our commitment to quality, consistency, and trust.

CUSTOM PRODUCTS BUILT TO YOUR SPECIFICATIONS

TESCO'S IN-HOUSE CAPABILITIES

Parts & Materials Shaping

- **Epoxy Casting**
High Strength resin casting for electrical components.
- **Metal Fabrication**
Cutting, bending & assembling for custom structures.
- **Stamping**
High pressure forming for consistent, high-volume production.

Precision Machining

- **CNC Machining**
Automated cutting & shaping for complex parts.
- **CNC Milling**
Rotating cutters for detailed part production.
- **CNC Turning**
High-speed shaping for cylindrical components.
- **Swiss Screw Machining**
Ultra precise production for small, intricate parts.
- **Centerless Grinding**
Flawless finishes & accurate dimensions for high-tolerance parts.

QUALITY YOU CAN TRUST

PARTNERSHIPS THAT LAST

Joining & Finishing

- **Welding**
High-strength bonding for durable metal assemblies.
- **Powder Coating**
Protective, long-lasting surface finishes.
- **Varnishing**
Insulation & protection for electrical components.

Electrical & Software Engineering

- **Winding**
Custom coil production for transformers & motors.
- **Software Programming**
Embedded control systems & automation.

THE TESCO ADVANTAGE:

Custom Production Runs

- No Need for large-scale.

Speed & Efficiency

- Faster lead times with in-house control.

Cost Savings

- Eliminate overseas tariffs & long shipping delays.
