

Test Equipment

Catalog No.

SSM-6330-KIT

Test Kit, 6330, Sub-Station Test Cables

**Power Meets
Precision
at the Point
of Connection**

Whether you're validating substation services or testing substation or intertie meters at the switchboard panel, the TESCO Test Kit, 6330 Sub-Station Test Cable set delivers reliable, accurate results.

Built to integrate directly with the TESCO 6330 Meter Site Analyzer and ABB FT-1 test switches, this adapter empowers utility technicians with the tools they need to troubleshoot, verify, and maintain the backbone of the grid—right where systems converge.

Test Equipment

Catalog No.

SSM-6330-KIT

Test Kit, 6330, Sub-Station Test Cables

Key Benefits and Features:

Ideal for Substation Testing

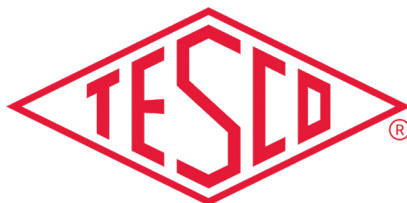

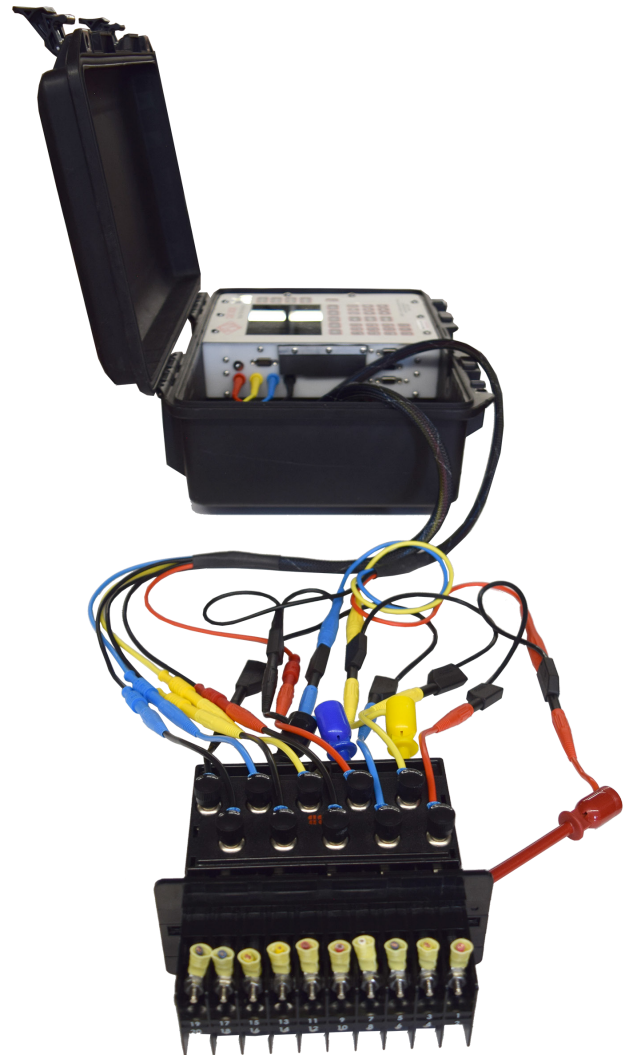

Allows the 6330 Meter Site Analyzer to easily test substation meters.

Isolation for Intertie Meter Testing

Isolate current elements while allowing for the application of service voltage to intertie meters that are wired through ABB FT-1 test switches (sold separately).

Built for the TESCO 6330 Meter Site Analyzer

Unlock the full testing capabilities of your 6330 with this purpose-built adapter.
