326 BT

Load Box Extension Cable Accessory

PRODUCT INTRODUCTION

The TESCO Metering 326-BT* is an add-on accessory designed for use with the 326P and 326X Load Boxes. It allows technicians to keep the load box at ground level while extending the connection point to the bucket for testing overhead pole-mounted current transformer (CT) installations.

With the included hooks, the 326-BT attaches securely to the bucket lip. A 28-foot extension cable connects the load box to the accessory, while a 10-foot test cable wraps through the CT for testing.

FEATURES

- Keeps the compatible load box at ground level
- Hooks securely to the bucket lip
- Provides safe in-air disconnect capability
- Supports clean, secure cable management
- Recessed quick-connects on the test cable eliminate exposed metal contacts near CTs
- TPE-ready cables with strain relief for long-lasting field performance
